Education

Texas A&M University **Aug. 2019 – Graduation Date: May 2024**
Ph.D. in Materials Science & Engineering *College Station, TX*

Autonomous University of Queretaro **Aug. 2013 – Aug 2018**
B.S. Nanotechnology Engineering *Queretaro, Mexico*

Experience

Texas A&M University **Aug. 2019 – May 2024**
Research Assistant *College Station, Texas*

- Calculated a stiffness constant database from DFT calculations. Then a state-of-the-art ML model was engineered to act as surrogate model.
- Using the CALPHAD method we calculate in a high-throughput manner thousands of datapoints. We then fit a DNN regressor of custom architecture and use it as a kernel in optimization tasks for Material Design.
- High-Throughput generation of a DFT database for different configuration structures for an alloy system. Then a GNN regression model is trained for the application of otherwise commonly expensive DFT tasks.

Texas A&M University **Aug. 2022 – May 2023**
Teaching Assistant *College Station, Texas*

- **Fall 2022 Thermodynamics in Materials Science · Graduate level**
- **Spring 2023 Thermodynamics of Materials · Undergraduate level**
- Created and graded challenging yet comprehensive homework set that helped the student approach thermodynamics from a Materials Science point of view.
- Created online supporting material in a weekly basis.

Selected Publications

Efficient machine-learning model for fast assessment of elastic properties of high-entropy alloys. Vazquez, G. et al., Singh, P., Sauceda, D., Couperthwaite, R., Britt, N., Youssef, K., Johnson, D.D. and Arróyave, R., 2022. *Acta Materialia, 232, p.117924.*

A deep neural network regressor for phase constitution estimation in the high entropy alloy system Al-Co-Cr-Fe-Mn-Nb-Ni. Vazquez, G., Chakravarty, S., Gurrola, R. and Arróyave, R., 2023. *npj Computational Materials, 9(1), p.68.*

Technical Skills

Programming Languages: Python, Matlab, C++, javascript, R, FORTRAN, SQL, HTML/CSS
Framework/OSs: GitHub, Windows, Linux, MacOS
Scientific Software: VASP, QuantumEspresso, VESTA, Xcrysden, Thermo-Calc, Origin, Gnuplot, Pandas, scikit-learn, pyTorch, TensorFlow, OpenCV
Languages: English, Spanish

Honors & Awards

Outstanding Teacher Department of Materials Science & Engineering Awards for my outstanding work as a TA in the MSEN 210 Course. **May 2023**
D3EM Certificate Recipient Accepted for the Data-Enabled Discovery and Design of Energy Materials (D3EM) Certificate. **Jun. 2020**
Youth of Excellence Prestigious Scholarship awarded to the brightest students in their undergrad class. **Sep. 2015**

Prof. Development & Certifications

SATA 2022 - School for Advanced thermodynamics Assessments **Jun. 2022**
1st Online VASP Workshop: Introduction to Ab-initio Simulation **Nov. 2021**
Computational Materials Science Summer School 2021 **Jun. 2021**
AFLOW Summer School on Computational Materials Science Across Scales Texas A&M University 2020 **Jun. 2020**
